TECHNOLOGY

  
H<sup>2</sup>O<sup>h</sup>  
just with water

## 3 technologies: 1 solution

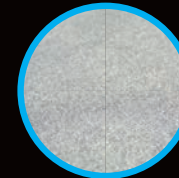

- Traitement révolutionnaire qui permet d'enlever les taches en utilisant **simplement un peu d'eau**
- Ce traitement permet de **supprimer les tâches** domestiques, tels que le cafés, l'encre, chocolat, vin, etc...
- Ce **traitement recouvre chaque fibre** d'une couche moléculaire invisible qui évite que la saleté pénètre dans le tissu.

1. Retirez l'excès du produit causant la tache sur le tissu (dans le cas d'une tache d'encre, gommer avec un tissu sec.)

2. Humidifiez légèrement la tache, soit en versant un peu d'eau directement dessus, soit à l'aide d'un chiffon propre et humide. Attendre quelques secondes.

3. Appuyez sur la tache à l'aide d'un chiffon propre puis effacez-la en réalisant des petits cercles jusqu'à disparition de celle-ci.

# Reinigen enkel met water

## 3 technologieën : 1 oplossing

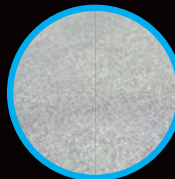

- Revolutionaire behandeling die toelaat om vlekken eenvoudig te verwijderen **enkel met water**.
- Behandeling die toelaat om **vlekken** zoals koffie, inkt, chocolade, wijn,... te **verwijderen**.
- Deze **behandeling voorziet elke vezel** van een moleculaire, onzichtbare laag die verhindert dat het vuil de stof indringt.

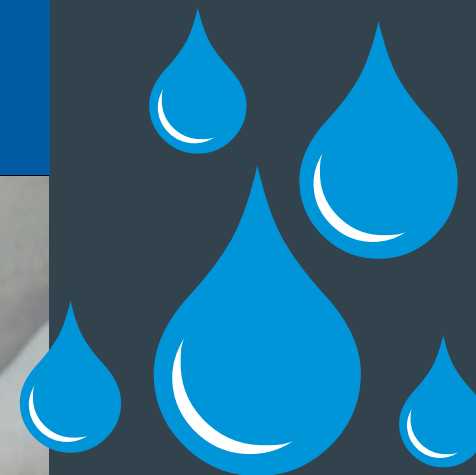

1. Verwijder het overtollig residu dat op de bekleding is gegoten.

2. Breng water aan op de vlek. Rechtstreeks of met een absorberende, vochtige en uitgewrongen doek. Wacht een paar seconden.

3. Druk met een doek op de vlek en wrijf zachtjes over de bekleding met rondgaande bewegingen. Als de vlek niet helemaal verdwijnt, herhaal dan het proces zo vaak als nodig.
